(365)-476-1626 || arshinshk07@gmail.com

## **PROFESIONAL SUMMARY**

Results-driven **Full Stack Developer** with 1.5+ years of experience in **full-stack development, software modernization, and enterprise solutions**. Proficient in **.NET, C#, JavaScript, React, and SQL databases**, with expertise in **Agile methodologies, unit testing, and CI/CD pipelines**. Demonstrated success in **building scalable applications, optimizing legacy systems, and collaborating with cross-functional teams** to deliver high-performance software. Passionate about **continuous learning and process improvement** in enterprise environments.

## **TECHNICAL SKILLS**

- **Languages & Frameworks:** .NET, C#, JavaScript, React, PHP, Python, Java, Node.js
- **Web Development:** HTML5, CSS3, REST APIs, MVC Architecture, Agile/Scrum
- **Databases:** SQL Server, MySQL, PostgreSQL, SQLite, Redis
- **DevOps & Tools:** Git, GitHub, JIRA, Azure DevOps, Docker, CI/CD Pipelines
- **Testing & QA:** Unit Testing, TDD, Automated Testing Frameworks
- **Soft Skills:** Problem-solving, Team Collaboration, Knowledge Sharing, Critical Thinking

## **EDUCATION**

### **Diploma – Computer System Technician: Software Support**

Mohawk College, Hamilton, ON | **Graduating Dec 2025**

- Relevant Courses: Java, Python, C#, Web Development, Cloud Computing, QA & Testing, DSA

### **Short-Term Diploma – Application Developer**

Information Technology Centre (ITC), India

- Core Programming: Java, Python | Focused on Databases & Software Tools

## **PROJECTS**

- **Tourism Web Application** – Developed responsive website showcasing Hamilton tourist attractions using HTML5, CSS3, and JavaScript. Implemented interactive mapping functionality, cross-browser compatibility, and mobile-responsive design with detailed information management system.
- **Portfolio Website** – Developed personal portfolio using HTML5, CSS3, and JavaScript with responsive design principles. Implemented contact form functionality, smooth animations, cross-browser compatibility, and deployed with proper documentation and version control.
- **React Card Deck** – Built a single-page application that simulates a full 52-card deck with dynamic interactions. Implemented functional components with hooks, state management, custom card rendering, and features such as deal, reset, pick & swap, wildcard creation, toss, and regroup. Styled with CSS for a professional UI and managed development using Git with frequent meaningful commits.

## **CORE STRENGTHS**

- **Full-Stack Development** – PHP, JavaScript, MySQL, REST APIs, MVC Architecture
- **UI/UX Optimization** – Responsive Design, Bootstrap, Figma, Accessibility Compliance

- **DevOps & Deployment** – Git, GitHub Actions, AWS (EC2, RDS), CI/CD Pipelines
  - **Leadership & Adaptability** – Team Collaboration, Agile Workflows, Problem-Solving
  - **First Aid & CPR Certified** – Workplace Safety Trained (Canadian Red Cross or equivalent)
-
